Introduction

The State of Minnesota's self-insured workers' compensation program is administered by the Minnesota Department of Employee Relations' (DOER) Employee Insurance Division. The program consists of four distinct units: claims management, disability management, legal, and safety/ industrial hygiene. It covers over 56,000 employees in the executive, legislative, judicial branches of state government and quasistate agencies, such as the Minnesota Historical Society and the Minnesota State Fair.

The state's workers' compensation program receives on average 3,000 new claims annually and is funded by an administrative fee charged to each agency it serves. During state fiscal year 2004 (FY 2004), the program's total costs experienced a decrease of 2.8% (\$635,681).

We present the following report on the program's activities during FY 2004. This report will present the costs of indemnity and medical benefits provided to injured state employees, summarize pertinent information regarding claims for workrelated injuries, and note other significant data compiled by the program during the past fiscal year. This information is provided to state agencies, legislators, labor unions, insurance industry professionals, and others interested in the general operation of the program.

The Workers' Compensation Program welcomes comments about this report. Please direct comments to:

How the Program Works

Mission and Enabling Legislation

The Workers' Compensation Program's mission is to work in partnership with state and quasi-state agencies to manage workers' compensation risk throughout state government. The Program works primarily through each individual state agency's human resource and safety personnel.

The enabling legislation for the Program is found in Minnesota Statutes 176.541 through 176.611.

The Four Distinct Units

To best serve state agencies, the Workers' Compensation Program delivers its workers' compensation services through four distinct work units: claims management, disability management, legal, and safety/industrial hygiene. Below is a brief description of what each work unit does.

Claims Management Unit

The Claims Management Unit determines liability for workers' compensation claims filed against the state and quasi-state agencies by state employees. It then contests or pays these claims in accordance with the statutory requirements of Minnesota Statutes 176. While carrying out this work, the Unit represents the interests of the state and quasi-state agencies.

In addition to its responsibility for the administration of workers' compensation benefits, the Unit also has the responsibility to direct the efforts to return injured employees back to the job, recover costs from negligent third parties, and to seek final resolutions for all claims.

Disability Management

The Disability Management Unit provides rehabilitation services for state agencies and for injured state employees. The primary purpose of the Unit is to work with employees and state agencies to help injured employees stay on the job or return to work as soon as possible. The Unit provides services such as vocational screenings/assessments, on-site job analyses, job placement, statutory rehabilitation and return-to-work plans.

Legal Services

The Legal Services Unit provides legal representation to state agencies in workers' compensation disputes. Its purpose is to conduct all aspects of defense litigation and provide legal counsel to state agencies and staff members of the Workers' Compensation Program. Its objective is to protect the legal interests of state agencies in disputed cases and, to defend or resolve these cases in the best interest of the state.

Safety & Industrial Hygiene

The Safety and Industrial Hygiene Unit provides safety and industrial hygiene consultative resources to all state agencies. Its purpose is to help state agencies identify and correct workplace safety hazards-both environmental and behavioral-that place employees at risk for work related injury or illness. The Unit provides safety-related services to agencies such as worker exposure assessments, indoor air quality surveys, employee training and safety program development.

Findings

The program received more claims (Chart 1 and Appendix A)

Number of claims increased (Chart 1)

The program had a 6.4% (169) increase in the number of claims reported from FY 2003 to FY 2004. Appendix A contains an agency-by-agency breakdown of the number of claims reported for FY 2003 and FY 2004.

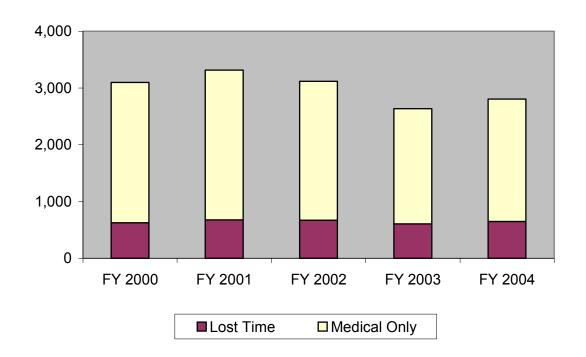

Increase in lost time claims (Chart 1)

Lost time claims, those in which the employee is disabled beyond a three calendar-day waiting period, increased 6.6% in FY 2004. *Medical only claims* increased 6.4% from FY 2003 to FY 2004.

Fewer claims were closed (Chart 2)

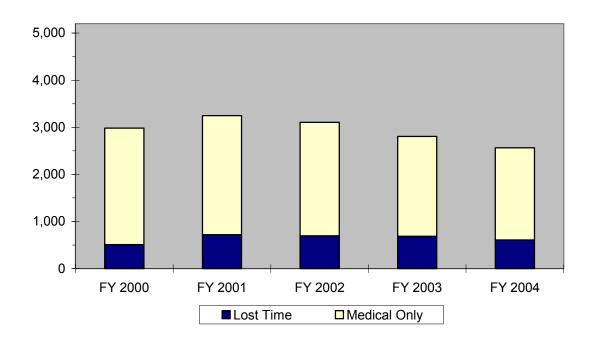

The program closed 242 fewer claims in FY 2004 than in FY 2003. The program closed fewer claims than received during FY 2004 (2,805 received vs. 2,565 closed).

The program experienced a decrease in total costs (Chart 3)

The program's total costs decreased 2.8% (\$635,681) in FY 2004 compared to FY 2003. From FY 2000 to FY 2004, total program costs have increased 10.2% (\$2,068,311). These costs include all benefits, program administrative fees, special assessments, reinsurance, and managed care administrative fees.

Benefits

Benefit costs include all benefits paid under Minnesota Statutes, Chapter 176. In FY 2004, these costs increased 3.8% (\$623,579) compared to FY 2003. From FY 2000 to FY 2004, benefit costs increased 17.2% (\$2,488,156).

Administration

In FY 2004, the program provided claims administration, safety and industrial hygiene consultations, and disability management/rehabilitation services with an operating budget of \$2,495,600 compared to \$2,936,763 in FY 2003, a decrease of 15% due to mandated budget reductions.

Special Assessments

The program's expenditure for *special* assessments decreased 35.8% (\$794,057) compared to FY 2003. Special assessments are levied by the Department of Labor and Industry (DLI) for payment of uninsured employer claims, reimbursement of supplementary benefits, and reimbursement of Second Injury Fund claims. This assessment is charged to all insurers and self-insured employers doing business in Minnesota based upon indemnity benefits paid. The decrease is due to a decrease in the special assessment rate from 30% to 27%.

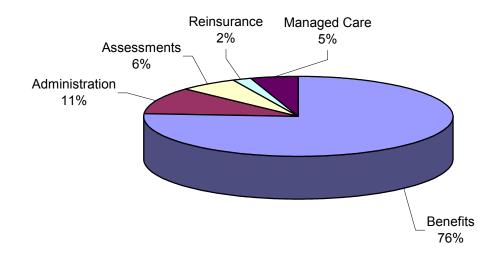

Reinsurance

The program's expenditure for reinsurance increased 13.7% in FY 2004 compared to FY 2003. The Workers' Compensation Reinsurance Association (WCRA) provides coverage to the state on claims exceeding our deductible (retention rate).

Managed Care

The program's payments for *managed* care services decreased 5.9% (\$67,713) from FY 2003 to FY 2004 due to a decrease in the number of state employees covered by the program. The rate for FY 2004 remained at \$1.77 per employee per month.

Assessments Overstated in FY 2003

Due to changes in the timing of payments to the Special Compensation Fund, three assessment payments were made in FY 2003. In all other fiscal years, two assessment payments were made. All three assessment payments are reported in **Chart 3**. In order to compare Total Program Costs for FY 2004, we have listed below what the Total Program Costs would be after factoring out the third assessment payment (\$705,964).

This change with the timing of the special assessment payments to DLI corrects a past practice, meaning that the reporting of two assessment payments resumed in FY 2004.

Impact on Total Program Costs/FYs 2000-2004

Subtracting the additional payment of \$705,964 results in a FY 2003 Assessments total of \$1,515,055. Consequently, the FY 03-04 column, the comparable number would be a -5.8% decrease for Assessments.

The Totals column across the bottom of the page would read as: FY 2003 \$22,245,097; FY 03-04 comparison -0.3% decrease.

The program's expenditures for benefits increased 3.8% (Chart 4)

In FY 2004, expenditures for *indemnity*, *medical expenses*, *rehabilitation*, and *employee attorney's fees* increased a total of 3.8% (\$623,579) compared to FY 2003. From FY 2000 to FY 2004, benefit costs have increased 17.2% (\$2,488,156).

Indemnity costs increased

Payments to compensate employees for lost wages or for permanent loss of body function increased 8.0% (\$554,916) in FY 2004 compared to FY 2003. Since FY 2000, indemnity costs have increased 4.2% (\$300,203).

Medical costs decreased

Payments for office and hospital visits, prescriptions, supplies, and reimbursements for travel and time off to see the doctor decreased slightly by 0.4% (\$25,534) in FY 2004 compared to the previous year.

Expense costs decreased

Expenditures for investigations, independent medical examinations, medical records, court reporters, deposition fees, and legal defense costs decreased 0.5% (\$3,242) from FY 2003 to FY 2004. From FY 2000 to FY 2004, expenses decreased 9.1% (\$63,400).

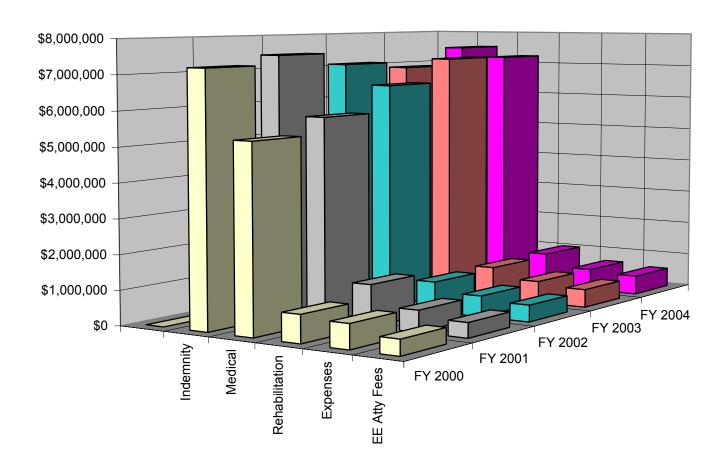

Rehabilitation costs increased

Expenditures for medical and vocational rehabilitation services that aid in returning injured employees to work increased 7.6% (\$70,725) from FY 2003 to FY 2004. Rehabilitation expenses increased 27.3% (\$215,572) from FY 2000 to FY 2004. The expenditure for rehabilitation benefits is a claims management cost that can help reduce indemnity benefits by returning employees to work as soon as they are able.

Employee attorney costs increased

Fees paid to attorneys representing injured employees in FY 2004 increased 5.1% (\$26,714) compared to FY 2003.

The majority of benefits were for indemnity payments to the employee (Chart 5)

In FY 2004, 42.7% (\$7,236,324) of the total benefits paid went to cover medical costs. 44.4% (\$7,521,542) of the total benefits paid went directly to employees in the form of indemnity payments to compensate for lost wages or for permanent loss of body function. The percentage of the total benefits going directly to employees is higher by 1.7% than the previous year (FY 2003) of 42.7% (\$6,966,626).

Chart 5/Composition of Benefit Costs/FY 2004

The program's expenditure for indemnity benefits increased 8.0% — \$554,916 (Chart 6)

The program's largest expenditure, indemnity benefits, increased 8.0% (\$554,916) from FY 2003 to FY 2004. Since FY 2000, indemnity benefits have increased 4.2% (\$300,203).

Types of Indemnity Benefits

Indemnity benefits are usually paid on a biweekly basis to compensate employees for lost wages and permanent loss of body function due to a work-related injury. Indemnity benefits fall into one of the following categories:

Temporary Total Disability (TTD) benefits are paid to employees who are unable to work, but who may be able to return to some type of work in the future. In FY 2004, TTD payments decreased 5.8% (\$122.004) compared to FY 2003.

Temporary Partial Disability (TPD) benefits are paid to employees who are able to work at either a reduced wage or a reduced number of hours. In FY 2004, TPD payments decreased 12.0% (\$74,656).

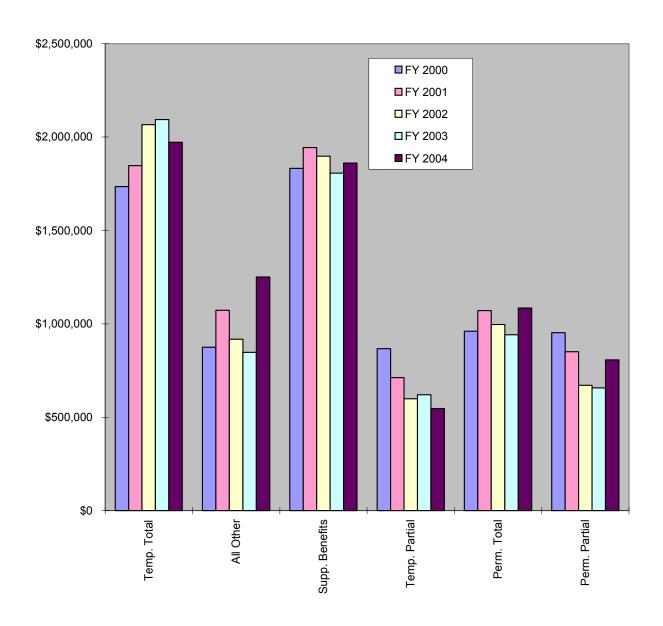

Permanent Partial Disability (PPD) benefits are paid to employees who have a permanent loss of body function. In FY 2004, PPD payments increased 22.8% (\$150,036) compared to FY 2003.

Permanent Total Disability (PTD) benefits are paid to employees who will never be able to work again. In FY 2004, PTD payments increased 15.2% (\$143,521) compared to FY 2003.

Supplementary Benefits (SBs) are paid in conjunction with PTD, or to bring payments up to a percentage of the statewide average weekly wage. The majority of employees who receive SBs also receive Social Security Disability benefits. The program does not invoice agencies for these benefit payments, but rather receives full reimbursement from the Department of Labor and Industry. In FY 2004, SB payments increased 3.0% (\$54,461) compared to FY 2003. The legislature has eliminated the requirement to pay Supplementary Benefits for injuries occurring on or after October 1, 1995.

Other Benefits include lump sums to settle claims, death benefits to dependents, and retraining benefits. In FY 2004, these payments increased 47.6% (\$403,558) compared to FY 2003. This increase is attributable to an increase in lump sum settlements paid in FY 2004.

Recoveries decreased 35.2% — \$1,291,378 (Chart 8)

Recoveries are funds the program receives from three main sources: supplementary benefits, Second Injury Fund, and subrogation. Total recoveries in FY 2004 decreased 35.2% (\$1,291,378) compared to FY 2003.

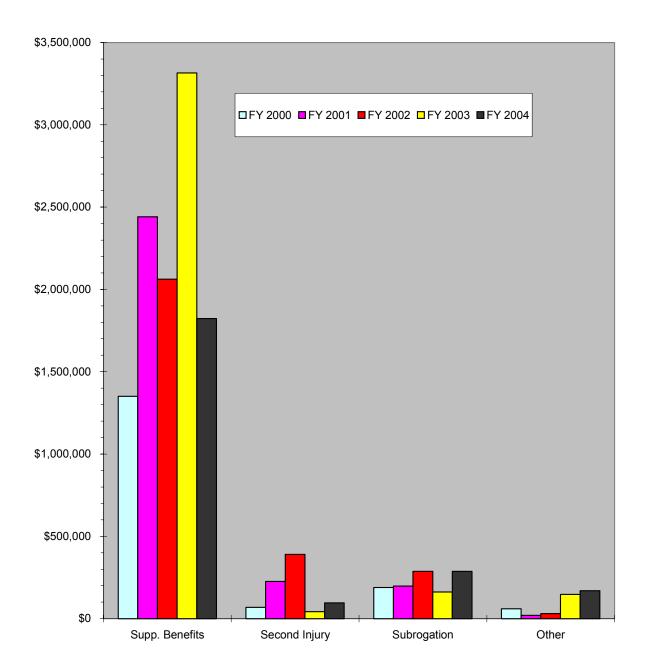

Supplementary Benefit Recoveries are reimbursed by the Department of Labor and Industry. In FY 2004, the recovery of these funds decreased 45.0% (\$1,491,234) compared to FY 2003.

Second Injury Fund Recoveries are reimbursed by the Department of Labor and Industry for benefits paid on claims in which the employee had certain pre-existing conditions. In 1992, legislation eliminated the Second Injury Fund for claims occurring on or after July 1, 1992. In FY 2004, the recovery of these funds increased 124.3% (\$53,414) compared to FY 2003.

Subrogation Recoveries are funds paid by third parties who are found responsible for employees' injuries and illnesses. From FY 2003 to FY 2004, the recovery of these funds increased 77.1%, (\$124,859).

Other Recoveries include funds obtained through contribution and reinsurance. In FY 2004, the recovery of these funds increased 14.6% (\$21,583) compared to FY 2003 mainly due to more claims qualifying for WCRA reinsurance reimbursement.

Claims that occurred prior to 1990 accounted for 22.3% of the program's FY 2004 benefit costs (Chart 10)

In FY 2004, the oldest claim the program managed was from 1956. Chart 10 shows a breakdown of total benefits paid from FY 2001 to FY 2004 for injuries occurring in calendar years 1956 through June 30, 2004. In FY 2004, 22.3% (\$3,777,051) of all benefits went to employees who were injured prior to 1990 which is a 5.8% increase of what was paid out in FY 2003 (\$3,568,665).

Claims follow predictable pattern

In terms of cost, claims tend to undergo a "maturing" process. Claim costs tend to rise in the year following the injury as further benefits are paid. Then, in subsequent years, claim costs tend to decrease. Chart 10 shows claims payments made in FY 2004 which demonstrate this pattern.

Eight agencies accounted for the majority of the program's activity (Charts 11, 12, and Appendices A, B)

The following eight state agencies reported 83% (2,322) of all claims and paid 85% (\$14,400,242) of all benefits in FY 2004. The eight agencies are: Human Services, MnSCU, Transportation, Corrections, Natural Resources, Public Safety, Veterans' Homes, and Administration. This compares with 84% (reported) and 85% (paid) in FY 2003.

To a great extent, the volume can be attributed to the agencies' size and/or the type of work they do. Agencies where a majority of the employees are engaged in office work tend to have fewer injuries than agencies with employees who work in nonoffice settings.

Charts 11 and 12 contain information on these eight agencies, while Appendices A (Reported) and B (Benefit Costs) contain agency-by-agency comparison of the number of claims reported and the amount of benefits paid in FY 2003 and FY 2004.

Chart 11/Composition of Reported Claims by Agency/FY 2004

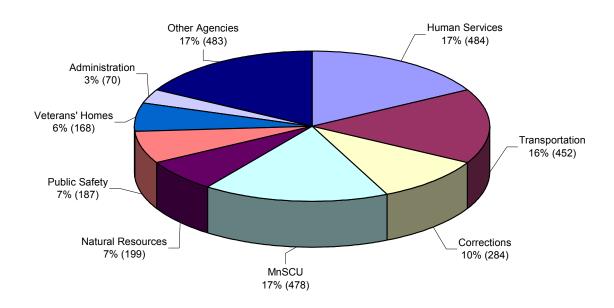

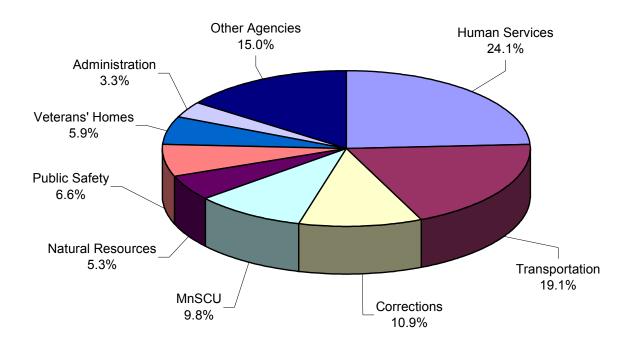

Chart 12/Composition of Benefits Paid by Agency/FY 2004

Benefit costs for these eight agencies increased 4.3% (Chart 13 and Appendix B)

Combined benefit costs for the eight large agencies increased a total of 4.3% (\$598,769) from FY 2003 to FY 2004. Chart 13 shows data for these eight agencies. Cost data for the remaining agencies is contained in Appendix B (p. 31).

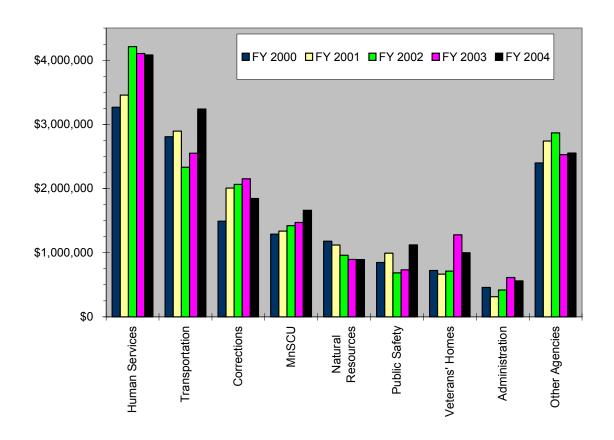

Caution urged when comparing agencies

It must be noted that comparisons of agencies' workers' compensation costs may be misleading and must be kept in perspective. One must consider many factors when comparing costs among agencies: the number and age of employees, the type of work done, the salaries paid, the number of hours worked, and the type and severity of injuries.

Declines in Costs for Five of the Largest Eight Agencies

The Department of Human Services' benefit costs in FY 2004 declined \$21,652 (0.5%), the Department of Natural Resources' benefit costs declined \$2,991 (0.3%), the Department of Corrections' benefit costs declined \$306,732 (14.3%), the Veterans Homes Board's benefit costs declined \$281,277 (22.0%), and the Department of Administration's benefit costs declined \$52,818 (8.6%). The remaining three agencies experienced a range of increases from 12.8% to as much as 52.9%. The combined total of all other agencies experienced an increase in benefit costs of 1.0% (\$24,810) from FY 2003 to FY 2004.

Most common injury was to the upper extremities, followed by multiple parts, neck/back, and lower extremities (Charts 14 and 15)

In FY 2004, 31.6% of all reported injuries were to the upper extremities (arm, shoulder, elbow, wrist), 18.8% involved multiple body parts, 14.0% to the neck/back, and 17.4% to the lower extremities. This composition of reported injuries shows that upper extremities continue to be the leading type of reported injury.

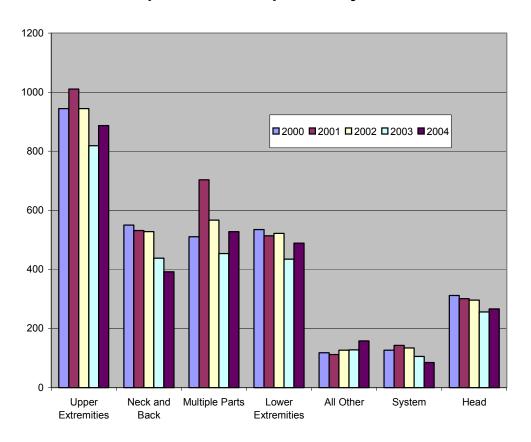

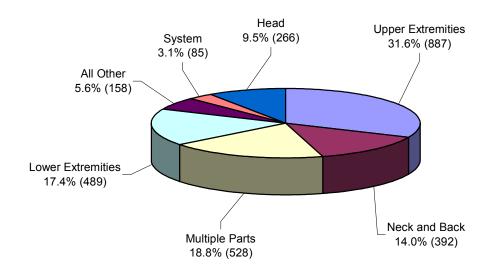

Chart 15/Composition of Reported Injuries/FY 2004

The average incident rate for these eight agencies and for all other agencies increased in FY 2004 (Chart 16)

The *incident rate* is an indicator of an agency's claims experience. It is an approximation of the number of reportable claims paid per year, per 100 full-time employees and is calculated as follows:

Number of Reportable Claims Paid x 200,000

Incident Rate =

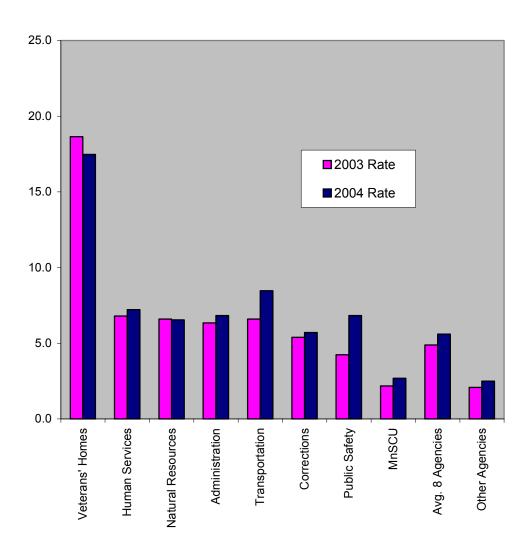

Total Employee Hours Worked

A *reportable* claim is one in which an employee seeks medical treatment, we accept liability, and expenses are paid.

The average incident rate increased from 4.9 (claims per 100 FTE's) in FY 2003 to 5.6 in FY 2004 for the eight large agencies who account for the majority of the program's claims reported and benefits paid. The rate for all other agencies increased in FY 2004, compared to FY 2003 by 0.4. This equates to more reportable injuries occurring for every 100 full-time employees. See Appendix C for individual agency incident rates for FY 2004.

Overall, the incident rate decreased from 5.1 in FY 2000 to 4.8 in FY 2004. See Chart 17 for five year rate comparison.

State Agencies Experience Compares Favorably to Other Employers *(Chart 18)*

Estimated cost per \$100 of payroll (Chart 18) benchmarks state agencies' total cost experience against all other employers in Minnesota. This is an estimate derived from data reported to the Department of Labor & Industry (DLI) and the Workers' Compensation Reinsurance Association (WCRA).

The estimate for state agencies was calculated from payroll and workers' compensation loss data reported to the WCRA and DLI. All administrative costs related to the operations of the Workers' Compensation Program were factored into the calculation.

The data indicates that state agencies workers' compensation total cost experience compares favorably to the estimated average for all Minnesota employers.

The estimated average for Minnesota employer's data will be added to this report when the figures are announced and released by DLI. DLI updates the estimates annually, including the estimates that had been previously reported. The Workers' Compensation Program will announce the addition of this data by sending out a Workers' Compensation Bulletin.
